VINTAGE TUBE OVERDRIVE VT911

en

Thank you for showing your confidence in us by purchasing the BEHRINGER VINTAGE TUBE OVERDRIVE VT911. This high-quality classic tube overdrive pedal is based on a hand-selected BUGERA 12AX7B vacuum tube. Get a whole tube amp in a pedal and take off with anything from warm blues overdrive to heavy distortion.

1. CONTROLS

Top view

1 Use the *9 V⎓* connection to plug in a 9 V power supply.

2 The 1/4" TS *OUT* connector sends the signal to your amp.

3 Use this 1/4" TS *IN* connector to plug in the instrument cable.

4 The *LEVEL* control adjusts the output level.

5 The *TONE* control allows you to adjust the overall sound.

6 The *DRIVE* control adjusts the amount of distortion. Extreme DRIVE settings result in a more compressed sound with less dynamics.

7 Use the footswitch to activate/deactivate the effect. The status LED beneath the LEVEL control illuminates when the effect is activated.

8 The BUGERA 12AX7B vacuum tube is placed here.

The *SERIAL NUMBER* is located at the underside.

2. SAMPLE SETTINGS
